Drive cover
Stainless steel cover allows for easy cleaning of the polishing chamber.

Control cabinet
Machine has the control cabinet integrated in the frame. The writing is placed on the side of the panel.

Control panel
Coloured 7" touch screen. User-friendly menu.

Container control
Position and fixture of the container is controlled by mechanic sensor.

Storage space
The lower part of the machine is dedicated for storing of format holders and polishing materials.

Process container
Machine is equipped in octagonal process container, which allows the optimal movement of the granulate during polishing process. In option available cooling jacket.
ADAMUS 60-80 P&D Polisher allows users to maintain a consistent high quality polished finish to the tooling surface. The machine is supplied with all the additional equipment and suitable polishing media required.
